

Advancement made in field of materials contributed in major way in technical development into some of the main industrial market fields: super alloys with enhanced performance levels are daily widely used for high performances in jet engines industry, leading the new design of industrial gas turbines and enabling oil & gas exploration, drilling and production under toughest environmental attack and extreme corrosion condition.

## SPOTLIGHT ON NICKEL & COBALT ALLOYS

in the following pages you can find detailed list of grades in our range and relevant products in our capabilities

903 - 909 - 907 - Hast X - 263 - 80A - X750 - 617 - 718 - 725 - 625 - B2 - C22 - C276 - 825 - 28 - 901 - 75 - 90 - Waspaloy® - L605 / 25 - 230 - H188 - 242 - 783 - 41 800H/HT - 600 - K500 - 400 - PE-16 - PE11 - PK-33 - 713LC - CoCr Alloy 1 - MP35N - F75

 production /  inventory /  stock

	 ingots & billets	 round bars	 flat bars	 hex bars	 sheets & plates	 tubes & pipes	 fittings	 rings & forgings	 fasteners
