

Special stainless steels are widely used on a large market, as they match an outstanding balance between technical and budget requirements. Capability to withstand to high corrosion environments and to offer mechanical properties in critical temperature services, makes special steels the cost effective solution for high performance applications.

in the following pages you can find detailed list of grades in our range
and relevant products in our capabilities

304H - 316H 316 C \geq 0.04% - 317L - 347H - 321H - 410 - 410 Mod. - S31254 - S32760 - S32750 - S31803 - S32550
